An exchange gets off the following, which is pretty nearly right: "A brother editor who knows it himself remarks that an editor of a country paper will grant more favors for thanks in a month than any other business man in a year. It is also a well established fact that he will receive more all-round cussing in a werk than any other man in a lifetime. That's the reason he is not afraid of hades."

The bridge over Eighteen-Mile Creek, in Pendleton Township, near Gantt's Store, fell in last Sunday morning while Sam. Death of Dr. P. A. Wilhite.

Dr. Philip A. Wilhite, one of the oldspected physicians in this portion of South Carolina, departed this life at his residence n Anderson at 6 o'clock, a. m., on Satur day morning, the 25th inst., after an ill-ness of more than one week from billious fever, followed with heart failure. He had passed his three score years and ten and for nearly forty years had been a resident and practitioner of medicine in Anderson, where he was known and respected for the many excellent traits of character established by his long and useful life in our midst.

Dr. Wilhite was born in Madison County, Georgia, and was the son of Mr. and Mrs. Turner Wilhite, of that County. His mother died when he was about six years old, and he was thus deprived of her loving care in his boyhood. His father was a farmer of limited means, but pos-sessed of an ordinarily good education, and he gave to Dr. Wilhite such common school education as the surrounding schools afforded, and he being ambitious and determined to enter professional life worked on the farm, and by energy and economy made the money necessary to enable him to study medicine. In 1842 he read medicine in the office of Dr. Crawford W. Long, of Athens, Georgia, and just preceding this and during this time he was connected intimately with and had an important part in the discovery of anesthesia—a boon to suffering humanity, which is ranked second only to the discovery of the principles of vaccination. The distinguished Dr. J. Marion Sims, of New York, in an article in the September number of the *Druggists' Circular* for 1878, wrote a noted article on the discovery of anæsthesia, in which he showed that Dr. Crawford W. Long was the first the specific of the control of physician to intentionally produce aniesthesia in his patients for surgical operations, and that he did so from reasoning it out from experimenting with sulphuric ether and after hearing of and being encouraged by the experience of his then student, Dr. P. A. Wilhite, at what they called ether frolics, near Athens, Ga., in 1839. Dr. Sims gives the account of this incident as follows: Old-fashioned "quiltings" were very

common in his day and time, and in the evening the boys and young men would go to these for the purpose of a dance or an ether frolic. On one occasion, he met several young people at Mr. Ware's, about five miles west of Athens, at a quilting. The girls and boys all finished the evening by in-haling ether. Some would laugh, some cry, some fight, and some dance, just as when nitrous oxide gas is inhaled. It was when nitrous oxide gas is inhated. It was in the fall of 1839. Wilhite was a romping boy of seventeen. All the boys and all the girls had inhaled the ether, some of them more than once. They were looking around for new subjects for it, when Wilhite saw a negro boy at the door, who wilhite saw a neigro boy at the door, who seemed to be enjoying the sport. Wilhite invited him to come in and try the ether. He refused. Other young men then insisted on his taking it. He refused again in a most positive manner; whereupon some of the thoughtless young men caught Hold of the boy, and called Wilhite to give him the ether. He struggled violently, but they threw him down and held him there while Wilhite poured out ome ether on a handkerchief and pressec it firmly over his mouth and nose. He fought furiously. They persisted, thinking it was great fun. After a long struggle, the boy became quiet and unresis-ting. The young men then let him alone. They were greatly surprised that he did They were greatly surprised that he did not get up immediately and sayor do some foolish thing for them to laugh at. He lay quietly, and with stertorous breathing. They tried to arouse him, but could not. They then became great-ly alarmed, and sent one of their num-ber on horseback for Dr. Sydney Reese, at Athens, five miles distant. The mes-canger rode with all possible speed. He at Athens, five miles distant. The ines-senger rode with all possible speed. He fortunately found Dr. Reese at home, who lost no time in going to Mr. Ware's. On his arrival, he found the negro lying on his back still soundly asleep. The young ladies had left the frightful scene. Young Withite, and his principal accomplice, thinking they had, in mere play, murdered a fellow being, were so much alarmed, that they had contemplated making their escape from the country; but the timely arrival of Dr. Reese soon sectored their courage. Dr. Reese beard restored their courage. Dr. Reese heard the history of the transaction. He then threw water in the face of the sleeping negro, slapped him, raised him up, shook him violently, and after a little he was relief of all present. The Doctor then gave the youngsters a lecture on the daners of such frolics, and cautioned them gainst a repetition of their heedless act. This of course broke up the ether frolics in this neighborhood. Dr. Wilhite thinks it was more than an hour from the time

the messenger started for Dr. Reese, till he returned with him to Mr. Ware's. The distance to Athens and back was ten miles, and all this time the negro boy was profoundly narcotized. From this it will be seen that Dr. Wilnite was really the accidental discoverer of this great scientific principle.

Soon after reading medicine with Dr.
Long he took a course of lectures in medcine in the University of the city of New York, and, returning home, located and practiced medicine in Carnesville, Ga., for several years. During this time he was married to Miss Cora L. Hilley, of Elbert County, Georgia, who survives him. After locating in Carnesville he practiced quite successfully and accumufracticed quite successionly and account-lated enough surplus to complete his professional education, which he did, in the Charleston Medical College, graduat-ing in the class of 1852, of which Dr. T. Gaillard Thomas, afterwards the famons New York physician, was a member New York physician, was a member. In 1853 he removed to Anderson, S. C., and lived for three years in the house situated where Mr. A. B. Towers now lives. He then bought the site upon which the family residence now stands and first built a two-room cottage on it in which he lived for two years until the which he lived for two years, until the elegant and commodious residence that now stands upon it could be erected.

When he came to Anderson his father When he came to Anderson his father moved here with him and taught school for a number of years in the Anderson Academy, then located where Mr. O. B. VanWyck now resides. Mr. Turner Wilhite a few years later moved to Elbert County, Ga., where he died on June 6th, 1861, at the advanced age of ninety-three

Williams went out and Mr. F. T. Wilhite, the Doctor's eldest son, became a partner, the firm name changing to Wilhite & Wilhite, and so continuing until the present time, although Dr. J. O. Dr. Wilhite was the oldest Mason, in time of membership, in the upper part of the State, if not in the whole State, having for very many years been a Royal Arch Mason, and being at the time of his death a respected and active member of Hiram Lodge, No. 68, A. F. M., and also of Burning Bush Chapter.

In 1878 Dr. Wilhite was appointed a member of the State Board of Health, then created by the Act of the Legislature of this State, and remained an earture of this State, and remained an earnest, efficient and influential member of the Board until his death. He was, we believe, the only member of that body who served so long, and was always most deeply interested in its proceedings, frequently coming in the Winter from his Florida residence to attend its meetings. He and Dr. Tabor were appointed by this body, on the request of the tropical fruit dealers of Charleston, to examine the ports of Cuba with reference to the propr quarantine regulatious for vessels of that island entering the ports of this State, and during that service experienced the fiercest of ocean temposts, and being for days in imminent danger of shipwreck. Many of the readers of the INTELLIGENCER will remember the graphic account of this voyage, written by Dr. Wilhite for this paper at the time. by Dr. Wilhite for this paper at the time.
Dr. Wilhite was a member of the United States Medical Association, and at its

meeting in New Orleans was included in those connected with the discovery of anesthesia who should be recognized by the government by pension for the scientific discovery, and a committee was apapointed to memorialize Congress to He was a prominent member of the South Carolina Medical Association, having repeatedly been Vice President of that body, and upon its most important committees His friends on several occasions wished to make him President of

Five children—three daughters and two nite. Soon after their removal to Anderson the family were called to mourn the death of little Laura, their oldest child, and yet again in 1880 grief came to them in the death of their third daughter, Mrs. Cora W. Baker, wife of Mr. W. F. Baker, of Atlanta, who died in the morning of a beautiful womanhood, leaving a daughter. cora W. Baker, wife of Mr. W. F. Baker, of Atlanta, who died in the morning of a beautiful womanhood, leaving a daughter and a son, of whom Dr. Wilhite was most devotedly fond. He leaves surviving him his widow, who several years ago lost her sight from paralysis of the optic nerve, and one daughter, Miss Mary

Wilhite, and two sons, Mr. F. T. Wilhite, one of Anderson's most progressive, en-terprising and successful business men, and Dr. J. O. Wilhite, an accomplished, skillful and rising physician of our city. As a husband and father Dr. Wilhite was affectionate and indulgent. He was devoted to his wife and fond of his children and grand-children, and was never as happy and contented as when he was

with them.

Dr. Wilhite as a physcian was learned, careful, attentive and successful in a marked degree. He kept thoroughly up with the progress of his profession. He was a very active man and did a very large and lucrative practice. He was a hard worker, a large part of his practice being a country practice, and in 1870, when returning from a visit to some patient, he was thrown from his buggy and tient, he was thrown from his buggy and his thigh broken. It required six months' rest to restore the broken limb, and it left him with a slight limp afterwards. He was very attentive to his patients and felt a deep interest in their troubles, being naturally of a kind and sympathetic na-ture. He was a warm friend of Dr. J. Marion Sims, of New York, and was associated from time to time in different ways with many of the leading physicians of the country. He was also a man of more than ordinary travel and acquaintance, both with people and places, and, being a keen observer, profited much by these experiences. During his practice he accumulated quite a handsome property, although it is probable that no physician in Anderson ever did a larger charity practice. He was always ready respond to the necessities of the poor and the needy.

Dr. Wilhite was first a member of th

Presbyterian Church, but before he came te Anderson he joined the Baptist Church, of which he was a consistent and earnest member up to his death. He was a member of the Building Committee which supervised the erection of the present Church before its enlargement and was always interested in its welfare and progress. He was a sincere Christian, and gave to his family in his last illness many evidences of his resignation and faith. He was not an obtrusive man, and did not push himself forward among men, but won his reputation and prominent position by his quiet worth and merit.

Martin, in the presence of a very large concourse of sorrowing friends. The funeral services were conducted by Hiram Lodge, A. F. In his death our city has lost another of its oldest and most honored citizens.
